

Location :

Distance
to school 600m
on cycle track

Plot :

Approx 5 are

2, 3 & 4

bedroom houses
available

Price from:
US\$
195,000

Set in almost two hectares of land on the ridge of the Ayung river, exactly half way between Seminyak and Ubud.

The Green Village is now open for pre-sale registrations. This landmark development, a truly luxurious and unique eco-development, is brought to you by a joint venture between PT Bambu, the team behind the world-famous Green School, and Tropical Homes, one of Bali's most respected developers with a seven year track record of luxury and quality developments on the island.

Solid timber homes built with engineered bamboo and Forestry Stewardship Council certified timbers, built on stilts on the ridge of the Ayung River, the homes in Green Village offer spectacular views, an un-spoilt rain forest setting, total comfort and lavish luxury, five star resort facilities and complete villa management services. The development, now in its final design stages, will consist of fifteen one, two and three bedroom riverfront homes, an oversized communal lap pool, club house, restaurant, fitness centre, business centre, storage facilities and kitchen gardens.

Obviously, the development is Grade One Ecology certified, using only FSC timbers and engineered bamboo, energy independence, closed bio systems and Permaculture principles. The development is situated just south of Green School and is less than 30 minutes from Seminyak and 20 minutes from Ubud
