

# GREEN SCHOOL SKILLS

Green School Skills are defined competencies that provide a structured guide for individual skills development. We use them as the backbone for all that we teach and learn--they are interdisciplinary, transferable and timeless. These competencies vary from person to person or place to place. Why Green? We learn "Green" because it represents our commitment to growing and healthy living things like ourselves, our students, our community, and our world. These skills are an integral part of **REAL** learning at Green School. The skills-based learning methods employed at Green School aim to develop the qualities, skills and competencies described in Green School's **Ambitions** and are directly informed by our school's mission: **A community of learners making our world sustainable**. The following are a set of nine Green School Skills that are vertically integrated across all Learning Neighbourhoods:

## Think, Act, Reflect

By nurturing 'Green School Skills' in our students we prepare them for their journey as learners for the rest of their lives. Students learn these skills through every part of our program, including projects and lessons that align with the Green School purpose of 'A Community of Learners Making Our World Sustainable'.
