

# Celebrate Change

Green School  
Giving Report 2018-2019

**“A Community of Learners, Making *Our* World Sustainable”**

[www.greenschool.org/support-us](http://www.greenschool.org/support-us)

It is with great pleasure that we share with you our achievements over the past year.

**This is our story. This is your story.**

As a 'giver', we know you want to make a difference in the world. We honor and respect you and want to share openly and proudly with you, all that has been achieved through your support.

Please take a moment to discover some facts and figures, a message from our Head of School Development and most importantly, the stories from the children of today and stewards of tomorrow.

# A Message from Green School Head of Community & Head of Development

**To our dear friends and supporters,**

More than ever before, children around the world are taking action to 'Make Our World Sustainable'.

2018/19 was the year that shone a light on the need to educate for sustainability - now. It was the year that children stepped into the global conversation on the future of the planet and demonstrated the leadership required. From global thinking to local action, young change-makers are stepping up and the world is listening.

At Green School Bali, 2018/19 was a year of innovation and growth. We launched new programs and projects and welcomed new students to our Local Scholar Program. We joined forces with others for greater impact and we continued to educate, support and empower young change-makers.

Without your support, trust and generosity, none of this would have been possible. To you, our partners in the mission to educate for sustainability, we thank you for your generosity. The gifts you have entrusted us with are reflected back to you in this Giving Report 2018/19.

We are pleased to share this Report with you, as a testament to the difference your gift has made, as a signal of transparency and sound financial stewardship and as a sign of our gratitude and respect.

It is an honour to come together with our friends, partners and sponsors to make a difference in the world, now. To all of you, *terima kasih banyak!*

**Kate Druhan**  
Head of People & Community

**Kania Maniasa**  
Head of Development

**DeAndre Saroinsong**  
Development Officer

# Highlights & Achievements

## Project Based Learning

Over 190 student projects, that is mapped to the UN Sustainable Development Goals, have been submitted to our Green Projects Hub. Through that our Project Bank has funded 31 projects with grants, and 4 student projects have been given loans to help achieve its mission, and create a wider impact locally.

## Real Skills, Real Solutions

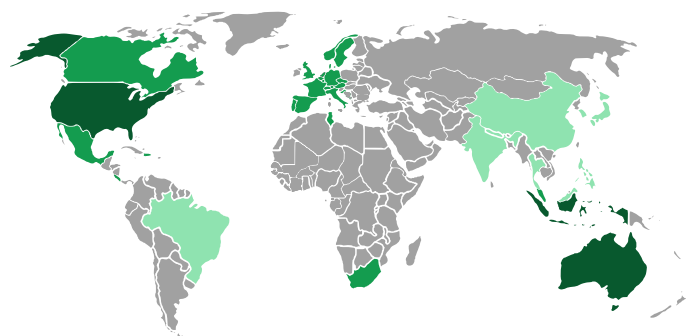

The intersection of the digital and physical world come together in one of the world's most innovative and greenest maker-spaces. Solar-powered, working with sustainable materials, repurposing, reusing and upcycling are at the center of this innovative model of maker-space learning. The inherent beauty of hands-on making is embraced as is mastering a deep understanding of design processes from start to finish.

We believe, with a zero-waste mentality, critical thinking is applied to the development of ideas and ultimately to designs. Reusing, repurposing and upcycling are core commitments in design processes – embracing the idea of a mini, circular economy within the Innovation Hub.

# Supporters from Around the Globe

Our wonderful donors come from all around the globe. Over 3,000 donors have supported the Green School Scholarship Program since 2009. Thank you for your kindness, for believing, and for being a member of our community of learners making our world sustainable.

## IGNITE: Fundraising Gala

In November of 2018, we ignited a new, and beautiful way to celebrate change. Which brought together our donors and partners joining us for a Balinese-themed evening at the heart of our campus. An evening curated to provide our guests the opportunity to give and at the same time the chance to experience Bali - the Green School Way.

**80**

like-minded philanthropists  
and changemakers

**\$116,000**

raised in our inaugural  
fundraising dinner

The evening began with fire in the mud, followed by a magical tour around the campus where students spoke from their hearts and shared their meaning of change.

The inaugural of IGNITE, and what is now going to be our annual fundraising event ended with great success, \$116,000 was raised by the end of the evening. Our guests left the event with love, joy and a sense of purpose. We cannot thank enough those who were able to attend, and who supported our Educating Change Makers campaign.

We look forward to hosting another memorable night this November. A final date will be announced and shared with you in the coming weeks.

# Alumni Story

Meet Ira Warastri, one of our earliest Local Scholar graduates at Green School, and most recently one of the few Green School alumni graduating from college. Ira credits Green School for opening up doors for her to study internationally and securing a scholarship at Quest University in Vancouver, Canada. She took a major in music and earned her bachelors degree in May 2017. During her time in Vancouver, she took a position as Social Media Manager, and Retail Supervisor of a local music merchandising store.

Ira had always asked the question 'why not?' every time she is presented with an opportunity. *Why not study at the Green School? Why not travel all the way across the world to pursue my passions in the arts?* To which she actually did. It was from these experiences she had gone through that she realized she wanted to become a changemaker through the arts.

*"This is how I communicate my ideas to the world and make positive differences. It is a lifelong process. I try to be a changemaker, to keep asking 'why not', to follow your dreams, to take a risk and to encourage others."*

Ira's wish for the future changemakers from Green School's Class of 2019: to strive and keep doing their passions. To not give up, be open, and to ensure there will always be someone who recognizes and supports you. We could not be prouder of Ira. Stepping up, making a bold move, taking her culture and traditions on her journey, living her life philosophy of 'why not' and finding her place in the world as a changemaker.

# Impactful Global Connections

Partnerships play a key role in our efforts to support the next generation of changemakers and allow them to make local and global impact.

## Intercontinental Hotels Group, Bali

Our newly formed partnership with InterContinental Hotels Group (IHG) provides collaborative learning and solutions creation opportunities. Our students visit their Bali hotels and act as auditors. They review performance on the water, energy, waste, and other sustainability metrics and make some recommendations. They construct an official report after each audit is completed and the project is highly collaborative with opportunities for mutual learning.

## Potato Head, Bali

As environmental sustainability practices become a crucial priority in the world, our partnership with Potato Head Family focuses on supporting young changemakers with access to environmental focused education. Providing them the tools, and the skills they need for their future. Four of our Balinese students are supported by Potato Head through our scholarship program. To raise awareness of environmental sustainability and promote sustainable design, together we curate free events and workshops open to the public.

## Zero Mass Water, Arizona

Six solar hydro-panels installed on our campus thanks to Zero Mass Water. These panels produce water by combining sunlight and air. Water vapor is collected from the air, mineralized, and delivered into a tap - ready to drink! Zero Mass Water are on a mission to provide clean drinking water to parts of the world where accessibility is scarce. With the mission of sustainability and community in mind, Green School collaborates with Zero Mass Water and hope that our students can learn from the application of their technology, and be inspired to provide even more creative-innovative solutions to provide clean-drinking water.

## Turbulent, Belgium

The journey of our vortex is filled with many ups and downs. But now, we can proudly present to you our newly installed and powerful vortex! With our friends, Turbulent from Belgium, we have successfully installed the turbine technology into the lovely Ayung River. Based on initial testing, the vortex can provide up to 65-80% of Green School's electrical needs when fully operating. Additionally, our hopes are to be able to produce in excess so that we are able to distribute not only for Green School but also export to the grid. With this new vortex, Green School can strengthen its goal to be 100% renewable.

# Special Thank You Note

Michael & Rachel Perrett, New Zealand

We would like to give a special thanks to Rachel and Michael Perrett. As former parents of Green School Bali students, beloved members of our global community, and founders of Green School New Zealand. They made it possible for us to build our beautiful new science lab, and kick-start funding for our green project center. Thank you for making an impact, and being the changemakers we need in the world!

## Green School Parent Association, Bali

Once a year our campus gets turned upside down for a community event, where for a change adults get to take over the school. This special night is called **'Rumble in the Jungle'**. It is a night curated and hosted by Green School Parents, and attended by all community members. This year the event was dedicated to raise funds to support the renovation and upgrade of our school library, and give our students access to more books.

**Thank you for your  
loving support**
