

BAN KI-MOON IN BALI

On August 28 the UN Secretary-General Ban Ki-moon witnessed the signing of a MoU on 'Green Schools for Sustainable Development' between the Green School Bali, the National REDD+ Agency and the UN Office for REDD+ Coordination in Indonesia (UNORCID). The MoU establishes a collaboration framework for knowledge exchange on embedding sustainable development into education systems, and will serve as input for the development of green schools in Indonesia. The signatories aim to have 1 million 'green youth ambassadors' in schools across the country by 2017.
